Our Vision

Every mother of a preterm baby deserves to dream of a bright future for her baby.

What Is The Project About?

We believe more preterm babies can survive with the right combination of care:

- Breathing support (CPAP)
- Specialized medicines (caffeine and surfactant)
- Supportive care

Why Is This Important?

Many preterm babies die unnecessarily because of breathing problems.

How Will It Help?

The project aims to determine whether a combination of these treatments can improve survival and health for preterm babies.

Where Is The Study Happening?

Kenya – Coast General Teaching and Referral Hospital and Mama Lucy Kibaki Hospital

Ghana

Nigeria

Central African Republic
